Programming is a job filled with details, and keeping track of those details requires focus. Hours drift by and the code appears. You look up and there are all of those statements. If you don't think carefully, you might think that programming is just typing statements in a programming language. You would be wrong, of course, but you wouldn't ...

Un langage de programmation est une notation conventionnelle destinée à formuler des algorithmes et produire des programmes informatiques qui les appliquent. D'une manière similaire à une langue naturelle, un langage de programmation est composé d'un alphabet, d'un vocabulaire, de règles de grammaire et de significations [1], [2].. Les langages de programmation permettent de décrire d ...
