The Modern World-System Immanuel Wallerstein----In order to describe the origins and initial workings of a world system, I have had to argue a certain conception of a world-system. A world-system is a social system, one that has boundaries, structures, member groups, rules of legitimation, and coherence. Its life is made up of the

The Modern World-System Immanuel Wallerstein

The modern world-system, a capitalist world-economy, is unique in being the first and only world-system, which emerged around 1450 to 1550, to have geographically expanded across the entire planet, by about 1900. It is defined, as a world-economy, in having many political units tied together as an interstate system and through its division of labor based on capitalist enterprises.

The Modern World-System Series by Immanuel Wallerstein

Wallerstein's modern world-system is specifically a capitalist world economy with capitalism defined as "the endless accumulation of capital" (Wallerstein 2004, p. 24). Using a metaphor that recalls the theories of Scottish economist Adam Smith (1723-1790), Wallerstein defines the world-system as a geographical division of labor.

Modern World-System Analysis | Encyclopedia.com

Wallerstein located the origin of the modern world-system in 16th-century Western Europe and the Americas. An initially slight advance in capital accumulation in Britain, the Dutch Republic, and France, due to specific political circumstances at the end of the period of feudalism, set in motion a process of gradual expansion.
